

Grand Valley Power
Rate IND-1
Industrial

Availability:

Available to all consumers located on or near the Seller's three-phase lines for all types of usage, subject to the established rules and regulations of the Seller. Service under this schedule is limited to consumers whose load requirements exceed 500 kW.

Applicability:

To all consumers served by the Cooperative.

Type of Service:

Three-phase, 60 cycles, at Seller's standard voltages.

Rate:

Distribution Charges:

Grid Connectivity Charge:	\$105.00 per meter per month
Distribution Demand Charge:	All kW per month @ \$3.50 per kW

Generation and Transmission Charges:

Power Supply Energy Charge:	All kWh per month @ \$0.06473 per kWh
Power Supply Demand Charge:	All kW per month @ \$5.50 per kW

In addition to the rates and charges described above, a Wholesale Power Cost Adjustment (WPCA) shall be applied to all kWh billed.

Determination of Billing Demand:

The billing demand shall be the maximum kilowatt demand established by the consumer for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as provided below.

Power Factor Adjustment:

The consumer agrees to maintain unity power factor as nearly as practicable. Demand charges may be adjusted to correct for average power factors lower than 90% if and when the seller deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 90% lagging.

Service Provisions:

1. **Delivery Point.** If service is furnished at secondary voltage, the delivery point shall be the metering point unless otherwise specified in the contract for service. All wiring, poles, lines and other electric equipment on the load side of the delivery point shall be owned and maintained by the consumer.

If service is furnished at seller's primary line voltage, the delivery point shall be the point of attachment of seller's primary line to consumer's transformer structure unless otherwise specified in the contract for service. All wiring, poles, lines and other electric equipment (except metering equipment) on the load side of the delivery point shall be owned and maintained by the consumer.

2. **Primary Service.** If service is furnished at primary distribution voltage, a discount of two percent shall apply to the demand and energy charges. However, the seller shall have the option of metering a second voltage and adding the estimated transformer losses to the metered kilowatt hours and kilowatt demand.
